support call centers assisting survivors of gender-based violence and violence against children.

Results to date

The system is already in place and has been scaled in Kenya, Tanzania, Uganda, and Lesotho in English. The prototype for the expected enhancements and functionalities uses an AI model to be developed and trained with non-identifiable data gathered by the company in the last 5 years.

Work plan

During the investment period, Bitz IT will focus on developing the algorithm for translation and voice recognition to support their rollout in new countries. Additionally, they will work on creating an AI algorithm to analyze captured data and generate valuable insights.

Investment rationale

The company has been working with UNICEF in five ESAR CO and the RO. Given their experience with data management systems, they are well positioned to generate analytics based on past trends. According to the RO, translation in regional languages could significantly help in expansion.

ALIGNMENT WITH UNICEF STRATEGIC AREAS

Health and nutrition
